Introduction

Welcome to InterpreterConnect!

InterpreterConnect provides a state-of-the-art and reliable system to ensure that we provide the best experience possible for our Clients and Interpreters. InterpreterConnect will allow you to connect with the Client and the Limited English Proficient (LEP) caller via any device (cell phone, tablet, or PC) in the most effective way possible, allowing you to process the call quickly and efficiently.

NOTE: All images displayed in this guide may not reflect all the possible variations and/or devices that may be displayed when you answer a call.

Learning Objectives

At the end of this course, you will be able to identify the following:

- Logging in, logging out, and set status for Breaks or Lunch.
- Receiving calls and greeting the Client.
- Performing dial-outs.
- Transferring for Assistance.

Listening

Calls can come in from different sources. Your key to success will be to **listen** to instructions from the Client or Customer Agent before taking any action.

Prepare Your Device

The following items must always be verified before you can log in to take calls. **FAILURE to follow these instructions will impact your ability to take calls.**

- Your device must be fully charged.
 - Keep your device plugged in whenever possible.
 - Check your battery status regularly.
 - There is no warning message when the battery is low when you are logged into InterpreterConnect.
 - Anything below 20% may lock you out of the system.
- Set the device to Airplane mode if available.
- Make sure to turn on Wi-Fi.
- **DO NOT** open additional websites or applications while using InterpreterConnect. This can cause you to go into an "Unavailable" state and may cause adherence issues. Refer to the section titled *"Accessing Company Allowed Websites While Using InterpreterConnect"* for details.
- Your workspace should be in a secure location free of any distractions such as noise, people, or animals.

Note for Contractors: Not all of the functionalities in InterpreterConnect will apply or be available.

Display View

InterpreterConnect will open in the appropriate display/layout depending on the device/size you are using.

- PC or laptop devices:
 - The layout will vary depending on the size of the browser window and will dynamically change if the window is resized.
- Tablets:
 - The display view is different if the device is in landscape or portrait orientation.
- Mobile:
 - The display view is specific to a mobile device in portrait orientation.

Landscape View

Portrait View

Notes:

- It is not recommended to use landscape view for smaller tablets and mobiles as it will not display a full screen.
- All images in this guide are in portrait view.

PIN (Personal Identification Number)

*Skip to the section ***“Existing Users”*** on page 7 if you have already changed your PIN.

First-Time Users – Changing your PIN in the Interpreter Portal

1. **ENTER** the following URL in the web browser: www.mylslworld.com.
2. **CLICK** “Change My Pin”.

3. **ENTER** your Interpreter ID.
4. **ENTER** the temporary default PIN 12345.
5. **ENTER** the new PIN following the PIN requirements on the screen.
6. **RETYPE** the new PIN.
7. **CLICK** “Change PIN”.

8. You will receive a confirmation message, *“PIN has been successfully reset”*. The new 6-digit PIN will be used to log in to **both** the Interpreter Portal and InterpreterConnect.

Note: Use the Safari or Chrome web browser.

First-Time Users - Changing your PIN in InterpreterConnect

1. **ENTER** the following URL in the web browser:
<https://interpreterconnect.myllsworld.com>
2. **ENTER** your 6-digit Interpreter ID number and the temporary default PIN 12345.
3. **CLICK** Login. The system will prompt you to change your PIN.

4. **CLICK** "Change your PIN". You will be redirected to the Interpreter Portal to create a new PIN.

5. **ENTER** your Interpreter ID.
6. **ENTER** the default PIN **12345**.
7. **ENTER** the new PIN following the PIN requirements on the screen.
8. **RETYPE** the new PIN.
9. **CLICK** "Change PIN".

A screenshot of the 'Change PIN' screen in the Interpreter Portal. The 'LanguageLine Solutions' logo is at the top left. On the left side, there is a form with four input fields: 'Interpreter / Agent ID', 'PIN', 'NEW PIN', and 'RETYPE PIN'. Each field is preceded by a red box containing a white number: 5, 6, 7, and 8 respectively. To the right of the form, the text 'PIN requirements when selecting a new PIN:' is followed by a bulleted list of rules. At the bottom of the form is a blue button labeled 'Change PIN', which is preceded by a red box containing the number 9.

10. You will receive a confirmation message, "PIN has been successfully reset". The new 6-digit PIN will be used to log in to *both* the Interpreter Portal and InterpreterConnect.

Note: Use the Safari or Chrome web browser.

Existing Users

Use the 6-digit PIN you have already created to log in to *both* the Interpreter Portal and InterpreterConnect.

If you forgot your PIN, or are unable to log into InterpreterConnect, contact the Interpreter Help Desk (IHD) at 1-800- 874-0271 for assistance or contact your local support team.

Logging into InterpreterConnect

Follow the below steps to log in:

1. **ENTER** the following URL in the web browser:

<https://interpreterconnect.mylslworld.com>

2. **ENTER** your 6-digit Interpreter ID number and PIN.

3. **CLICK** "Login".

Note: Use the Safari or Chrome web browser.

2-Factor Authentication

The 2-Factor Authentication ensures that only authorized users (you) can log into your account. This is required:

- Anytime you log in using a NEW device.
- After you clear your browser's cache.
- When it has been more than 30 days since your last login.

After the initial verification, you will only need your ID and PIN to log in. You will be prompted to enter the verification code sent to your Rackspace email for identity verification. The code expires within 30 minutes.

NOTE: If you have already successfully logged into your device you may skip these steps and proceed to step 7 on the next page.

4. **STOP** here. **LOG IN** to Rackspace for the verification code.

5. **FIND** the verification code in your Rackspace email.

6. **ENTER** the verification code in your device and TAP "OK".

7. The Login process will automatically resume.

8. You are now logged in. **TAP** "Unavailable" in the State Bar.

9. **TAP** "Available".

10. You are "Available" to take calls.

Login Failure

The login process can fail due to the following reasons:

- Attempting to log in with invalid information.
- Failure connecting to the system.
- The system will provide an error message according to the reason for failure.

If you are still not able to log in:

- **SUBMIT** a Support Request under the Category, "Ongoing Technical/Equipment Related Problem" through the Interpreter Portal at myllsworld@languageline.com.
- **CONTACT** your designated support group according to your geographic location.

Receive a Call

Calls can come in based on business needs. Continuous mode is the setting in which most calls will come in. However, you still need to be familiar with Per-Call mode which you can switch to depending on business needs. There are slight differences between the two modes so you will need to be aware of the two modes to process calls effectively.

Per Call Mode vs Continuous Mode

Per Call Mode	Continuous Mode
• You will hear the whisper prompt, "Incoming Audio Call" when a call comes in. ○ Answer the call promptly. Your state will change to <i>Unavailable - Refused</i> if you fail to answer the call on the first ring. This will affect your adherence.	• You will NOT hear the whisper prompt, "Incoming Audio Call" when a call comes in.
• Requires you to TAP "Answer" on the screen to connect with the Client.	• You will NOT need to TAP "Answer" on the screen.
• You will hear the zip tone after you answer the call.	• You will hear the zip tone when a call comes in.
• The phone will not ring. ○ Android users: your phone will vibrate when a call comes in only if you have the vibrate mode enabled. ○ iOS users: your device will not vibrate regardless of the mode you are in.	• The phone will <i>never</i> ring.

Allow Notifications

You will be prompted to allow notifications.

- You may be prompted to allow notifications depending on the device and browser you are using.
- You should always allow notifications.

Allow Microphone Access

You will be prompted to allow microphone access.

iOS:

- **TAP “Allow”**
 - You may be asked to allow microphone access throughout your shift.
 - You can prevent this by tapping on the “aA” button to the left of the address bar, tapping Website Settings, and then changing Microphone to “Allow”.

Android:

- **TAP “Allow”**
 - You will only be prompted **TAP “Allow”** on the first call, the first time you log in on a new device.

Greeting

- ✓ GREET the Client by reading the script exactly as it is displayed on the screen.
- ✓ The greeting will contain your first name, Interpreter ID, and Language.
- ✓ The branding in the greeting will change with each call depending on the Client.
- ✓ The Opening Statement Disclosure will be displayed within the greeting when it is required to be stated.

Opening Statement Disclosure

The Opening Statement Disclosure is required as part of the Interpreter greeting. This disclosure must be mentioned to the Client AND the LEP individual in calls where it is displayed within the greeting.

"I am proud to serve you. This call may be monitored for training and quality assurance purposes."

When to mention the Opening Statement Disclosure?

- ✓ When it is displayed within the greeting when you receive a call.

When to exclude the Opening Statement Disclosure?

- ✓ When you hear a "whisper prompt" notifying you *not* to use the disclosure statement.
- ✓ For the following Clients: 911 (US) / 999 (UK), FEMA (Federal Emergency Management Agency), USCIS (United States Citizenship and Immigration Services), Court, Citibank.

Important notes:

- ✓ Calls are ONLY being monitored; NOT recorded. DO NOT confuse recorded for monitored.
- ✓ This disclosure does not replace any other medical or legal disclosures that are required for specific industries. You need to follow what is displayed on your screen and the instructions provided by the Client. You must say this one AND any other required disclosure.

Alert Note

The Alert Note has special instructions from the Client on how to proceed with the call such as information on what to do in certain situations, restrictions related to dial-outs, or anything you need to know to process the call successfully. Read the Alert Note as soon as you receive the call and follow the instructions. Please note not every client call will display an Alert Note.

Mute

You should not be on “MUTE” in between calls. Mute yourself only when necessary, such as when you need to sneeze, cough, drink water, etc.

Mute: **TAP** the “Mute” button. A backslash line (\) on the mute button will indicate you are muted. The Client and LEP will NOT be able to hear you.

Unmute: **TAP** the “Mute” button to remove the backslash line (\). Once the backslash line (\) is removed you will be unmuted. The Client and LEP will be able to hear you again.

Mute Banner

The system will now notify you if you start speaking while you're muted.

The “Your microphone is muted.” banner will display on the screen when you are muted, and you speak into the microphone.

Note: This feature will **ONLY** work when you use the “Mute” button in InterpreterConnect.

Data Collection Banners

The Data Collection Banner(s) is a visual reminder that data needs to be collected before you start interpreting.

Red

Data Collection is Required. The banner will turn green once the data collection questions have been successfully answered.

A red banner with a 'STOP' icon and the text 'Data Collection is Required'. Below the banner are four data collection questions, each with an input field and a 'N/A' checkbox.

May I please have your Last Name?		☐ N/A
May I have your insurance company?	OTHER	☐ N/A
May I please have your badge number?		☐ N/A
May I please have your building number?		☐ N/A

Green

Data Collection is Complete. You may proceed with the interpretation.

A green banner with a checkmark icon and the text 'Data Collection is Complete'. Below the banner are the same four data collection questions as in the red banner, but now they are filled with data.

May I please have your Last Name?	SMITH	☐ N/A
May I have your insurance company?	OTHER	☐ N/A
May I please have your badge number?	831	☐ N/A
May I please have your building number?	2	☐ N/A

Data Collection Questions & Fields

Data Collection is a Client requirement and can impact billing for LanguageLine. If the Data Collection questions are not answered, the Client may not pay for the call.

Data Collection Standards

- Read the greeting and data collection questions exactly as displayed on the screen.
- Silently read the Alert Note and hints for any additional instructions for call processing and data collection.
- Type data exactly as stated by the caller.
 - Example: "PEDS" cannot be entered as "PEDIATRICS."
- Do not abbreviate the answers provided.
 - Example: "OBSTETRICS AND GYNECOLOGY" cannot be entered as "OB/GYN."
- Enter dates in this format: Month/Date/Full Year
 - Example: 01/30/2024
- Names: Verify the spelling of any name that may have multiple spellings or names that you do not know how to spell, including location and facility names. Review the Alert Note and Hints for additional guidance.

- **Maximum Characters:** The data fields are a set length of characters. If the information provided by the Client is longer than the maximum number of characters, enter the abbreviated version as needed to fit in the data collection field.
 - Example: Sutter Medical Foundation Solano Division East Street

Steps for Data Collection

1. ASK the data collection questions to the Client. If any data collection questions are prepopulated and grayed out, these do not need to be collected unless you notice inconsistency in the answer listed based on the hints and/or Alert Note.

- READ the data entry hints next to each data field (if any).
- Pay attention to the Alert Note for any additional instructions related to the data collection questions.
- The data collection questions will gray out after they have been answered.

2. ENTER or SELECT the information in the blank field. There are two options:

a. Free typing is available.

a. ENTER the information in the blank field.

May I please have your Last Name?

☐ N/A

Please check spelling

b. Free typing is not available.

a. OPEN the selection list as it appears on your device.

b. SELECT the answer from the selection list as it appears on your device.

May I have your insurance company?

☐ N/A

May I have your insurance company?

☐ AETNA

☐ OBAMACARE

☐ OTHER

☐ N/A

Stay on Call Reminder

The icon of a miniature person indicates that the billing data may need to come from the LEP caller before interpretation begins.

May I have your insurance company?

☐ N/A

N/A Checkbox

Use this option when the Client is unable or unwilling to provide the information requested.

CLICK the box next to N/A.

May I please have your Last Name?

☐ N/A

Please check spelling

The N/A checkbox will NOT be available for questions that require a mandatory answer.

If the Client is unable or unwilling to provide the answer and the question requires a mandatory answer, you can use the following script:

"Unfortunately, without the proper answer to the Data Collection question(s) required by your organization, I cannot proceed, but if you call us back with the requested information, we will be happy to assist you."

Hints

Hints provide additional instructions for call processing and data collection. The location of the hint will vary depending on the display view.

May I please have your Last Name?

☐ N/A

Please select from the list

Dial-Outs

Proceed to offer a dial-out on every call unless there is a restriction indicated in the Alert Note. You can place domestic and international dial-outs using InterpreterConnect.

Offer a dial-out by using the following script:

"Is your customer with you or do you need me to call them for you?"

There are 2 types of dial-outs you can make for our Clients: single dial-out or multiple-party dial-out.

1. A Single dial-out is when you are calling one person to be added to the existing call with you and the Client.
2. A Multiple-party dial-out is when you need to add multiple people to the same call with you and the Client.

Placing a Dial-Out

Gather any information from the Client that you need to relay to the party who may be answering or voicemail message, if applicable. Say to the Client, “Please hold for your dial-out”.

1. **TAP** the “dial-out” field.
2. **ENTER** the number exactly as provided by the Client and **TAP** “Dial”.
3. The Client is placed on hold and the dial-out takes place.
4. All parties have been connected.

5.
the

Introduce
individual who

answered the phone by using the following script:

Hi, I am a (language) interpreter. I have (Client's name) on the line. One moment, please...

Note: Include the LLS Opening Statement Disclosure when applicable. Please refer to the Opening Statement Disclosure section in this guide.

6. The connected party now appears in the connections area. If you reach the voicemail, leave the message in the target language.

Single Dial-Outs to Different LEPs on the Same Client Call

You can process as many single dial-outs as the Client needs on a call. For example, A Client calls and notifies you he needs to contact 4 different patients separately. The Client will provide you with the phone number and information for each patient.

Follow these steps when the Client is requesting dial-outs to different LEPs on the same Client call:

1. Dial out the number provided by the Client and follow instructions.
2. TAP the red phone to disconnect when the call ends.
3. Continue to follow the instructions provided by the Client for each dial-out needed.

Multiple Party Dial-Outs

You can add up to 5 parties to the same call with you and the Client when the Client needs to dial out and have multiple parties connected at the same time to the existing call.

Follow the instructions for a single dial-out. After having successfully connected to the first party follow these steps to add the following parties:

1. **TAP** the “dial-out” field and **DELETE** the phone number.

2. **ENTER** the number exactly as provided by the Client and **TAP** “Dial”.

3. The next dial-out automatically conferences in the individual to the call.

Keypad

Use the keypad to enter an extension number or select a menu option.

1. **TAP** “More”.

2. **TAP** “Show Keypad”.

3. **TAP** the digits needed.

Drop One or More Parties from the Call

You can drop a party from the call upon a Client request.

1. **TAP** the red phone to drop a party.

Dial-Out Failed

You may encounter a dial-out failed message when you are not able to successfully perform a dial-out. An error pop-up will display the reason according to the issue.

1. **TAP** “OK” and inform the Client you are unable to process the dial-out.

The following images are just two examples of a failed dial-out.

Get Assistance

InterpreterConnect allows you to transfer the Client to another department. You will provide a warm transfer to the Client, meaning you will talk to the answering person before transferring.

A warm transfer allows you to provide details about the Client’s situation to the Customer Agent (CA) while the Client is still on hold. This provides your colleague with the information needed to better assist the Client as soon as you complete the transfer.

You will need to transfer the Client to a Customer Agent (CA) if:

- The Client needs an Interpreter for a different language.
- The Client requests a different gender to interpret the call.
- The Interpreter is experiencing technical issues with the system but is still able to use the transfer function.
- The Client has a request for something other than interpretation, such as billing questions, supervisor/commendations, renew contract, and other services offered by LanguageLine.

1. TAP “Get Assistance”.

2. TAP “Contact Customer Agent”.

3. A pop-up displays Contact Customer Agent.

4. Once the Call Agent answers the call introduce yourself by using the following script:

- *This is (your name), (language) interpreter. I'm transferring a call to you because it is for a different language, needs the opposite gender, has billing questions, etc.*

5. TAP “Transfer”.

End of Call

The End Call button is used to disconnect ALL parties on the line. It should be used when the Client requests you to leave the call or if the Client does not end the call by hanging up on their end.

1. **TAP “More”.**

2. **TAP “End Call”.**

3. **TAP “OK”.** **TAP “Cancel”** if you do not want to disconnect the call.

After Call Work (ACW)

After Call Work is the state in which the system will **automatically** place you in after a call ends. After 15 seconds, the system will automatically make you “Available” again. You can also make yourself “Available” before the ACW ends by tapping the state bar and selecting “Available”.

States (Red, Yellow, Green, Blue)

Your State will be Red, Yellow, Green, or Blue to reflect your current state.

1. **Red** = Unavailable and action is needed.
2. **Yellow** = Unavailable for Break and Lunch.
3. **Green** = Available and READY to receive calls.
4. **Blue** = Busy servicing a Client call.

Unavailable
0:02
Break
0:02
Available
0:01
Busy
0:13

State Change

1. **TAP** the “state bar”.
2. **CHOOSE** your desired state.

Report Call

The Report Call feature allows you to report issues using 5 main Report Call categories and sub-categories. Some of these subcategories will require additional supporting comments.

Please refer to the table below for the categories and sub-categories:

1. Problems at the start of the call	• Received a call and nobody was there • LEP Call • Wrong language
2. Audio or video problem	• The Customer couldn't hear me • Static on the line • Too much background noise • Poor video quality
3. It's something else	• Something else happened • Report Safeguarding Concerns
4. Call ended mid-conversation	• Call UNEXPECEDTLY ended mid-conversation • Customer never returned from hold (followed hold time policy) • Customer said they no longer needed interpretation
5. Did not service call	• Dial-out didn't work at all • Difficult Client or LEP • Difficult Vocabulary or Terminology • Test Call

Important Notes:

- Calls received **only** in the last 24 hours from the same device are listed to submit a Report Call. If you would like to view the details of previously submitted call reports, this can be viewed in the Interpreter Portal.
- You will not be able to submit reports during your Breaks or Lunch. The Report Call button is not displayed while in an Unavailable state.
- If you receive a new call while you are in the process of submitting a call report, it will be automatically submitted **if you** selected the call, the category was selected, and any additional details were entered in the Comments section if required. If it's not complete, the report will be discarded.

The following screenshots show how to submit a Report Call.

1. **TAP** "More".

2. **TAP** "Report Call".

3. **SELECT** the call to report. **TAP** on the call you wish to submit a Report Call for.

4. **TAP** the main category you need from the category list.

5. **TAP** the subcategory you need.

6. **TAP** "Submit Report". The Submit button may or may not be enabled depending on if required comments are needed for the selected issue.

7. **TAP** "OK". You will return to the Available screen.

Scripts

Our Clients provide scripts and other materials to LanguageLine Solutions that are currently located in the Interpreter Portal Libraries. You can also access these materials (if client provided) within InterpreterConnect. Access the "Scripts" with the following instructions.

1. **TAP/CLICK** the Scripts button in the blue bar below the greeting. The number indicates the number of available scripts for the client.

2. **TAP/CLICK** on the script you want to read.

3. **TAP** on the minus (-) and/or plus (+) buttons to zoom in and out.

4. **TAP/CLICK** on the "Mute" button if you need to mute yourself while using the Scripts feature.

5. **TAP/CLICK** on the red "X" button at the upper right to close the Scripts pop-up.

Note: The Scripts button will only appear if the client has provided scripts for your call.

Internal Message Notifications

The internal message notification is also known as “**Toast Notification**” which will appear on your screen and will be used to keep you updated on critical system issues, adherence, and other important reminders.

If you receive more than one message, the messages will appear in order of severity. The most critical message will show first. **TAP** to “Dismiss” the current message and/or to view the next message.

Landscape View:

- The message will appear at any time while logged in.

Portrait View:

- The message will appear *only* while logged in and not on a call.

The following are the three levels to help you identify the importance of the message.

1. Informational = Blue

2. Warning = Yellow

3. Critical = Red

Schedule View for Scheduled Interpreters

Within InterpreterConnect you can view your daily schedule. The color codes you see in the app correspond to the same colors in Impact360.

The schedule view does not apply to contractors.

1. **TAP** “More”. **TAP** “View Schedule”.

2. Your schedule displays.

Early Start Prevention

Your ability to log into InterpreterConnect and become “Available” is coordinated with your scheduled shift. If you log in outside of your shift or try to become “Available” before your Break or Lunch is over, a “Not Yet” message will be displayed advising you of your schedule.

Early start prevention is not applicable for contractors.

Take a Break/Lunch

Breaks and schedules are displayed in Impact360.

- You can select the option to make yourself Unavailable while on a call. Once the ACW ends, your state will be updated to your requested state, and you will not receive another call until you make yourself Available again.
- The timer at the bottom of the tile shows how long you have been in the state that you selected so you can make sure to be back on time after your break.
- Interpreter employees should always refer to Impact360 for your schedule.

Break and Lunch are not applicable for contractors. Contractors must completely log out to take a break, lunch, or stop taking calls.

Go to Break or Lunch for Employee Interpreters

1. **TAP** "Available".

2. **TAP** "Break" or "Lunch".

3. Your state changes to the selected option.

Returning From Break or Lunch for Employee Interpreters

To return from Break or Lunch, simply **TAP** the "state bar" when you return from Break or Lunch to make yourself Available to continue to receive calls.

Logout

The following are the reasons why you will need to log out of the system:

- At the end of your shift.
- To attend training.
- To take a health break.

Contractors can log out at the time they choose to end taking calls.

1. **TAP** “Available”
in the state bar.

2. **TAP** “Logout”.

3. You will be taken back to
the initial login screen.

Note: You can **TAP** “Logout” while on a call. Once the current call ends, the logout process will complete automatically.

Internet Outage Notification

InterpreterConnect will notify you when you’ve been logged out due to a lost internet connection.

Update Available

InterpreterConnect may display a pop-up notification “Update Available”. This notifies you there is an update available. Follow the steps as displayed on the screen.

Direct Response Calls

Direct Response is another way Limited English Proficient individuals (LEPs) and Clients are connected to Interpreters. With Direct Response, Interpreters first speak with the LEP in language and after a few moments, both you and the LEP are automatically connected to the Client. For our Clients, this helps to increase operational efficiency and improves their customer experience with Interpreters providing in-language service from beginning to end.

What does the call flow look like?

LEP

Interpreter

Client

- LEP dials the dedicated toll-free number.
- LEP connects with an Interpreter.
- Interpreter receives the call and hear the whisper prompt.
Whisper Prompt: *Interpreter, please answer the call in language. Collect the name of the caller. You and the caller will be automatically redirected to a representative shortly.*
- Interpreter introduces self in language.
 **Script to say to the LEP:** *My name is (state your name) and I will be your Interpreter. May I please have your name? Thank you. One moment while we are connected to a representative.*
- Read the Alert Note for additional instructions.
- Call is automatically transferred to the Client which can be approximately 30-60 seconds.
- Client will come on the line with the Interpreter and the LEP
Script to say to the Client once connected: *Hello, my name is (state your name) ID 123456. I'll be your (language) interpreter today. I have your (language) speaking client on the line with me. His/her name is (state name). I am ready for further instructions.*

What do I do when I reach the Clients voicemail?

There are two scenarios in which you may get the Client's voicemail:

1. The intent is to connect you and the LEP *with* the Client, but instead, you are connected to the Client's voicemail. Follow these steps:
 - Inform the LEP that you've reached voicemail.
 - Quickly interpret the voicemail message for the LEP.
 - Obtain the LEP's response.
 - Leave the message IN ENGLISH on the Client's voicemail.
 - Inform the LEP that you have or have not been able to leave a message in English and say goodbye to the LEP.

Note: You may have limited time to leave a message for the Client in English. It is important that you leave some sort of actionable message in English for the Client. At a minimum, be sure to state the LEP's name and contact information in addition to the purpose of the call.

2. Client-specific Direct Response Call Flows. Some Direct Response call flows have been set up to intentionally reach a voicemail account. Follow these steps:

- You receive a call and hear the whisper prompt with specific instructions on how to obtain information from the LEP for the sole purpose of leaving a voice message.
- Follow the prompt instructions.
- Listen to the voice message for instructions on information needed.
- Obtain the information from the LEP.
- Interpret the message IN ENGLISH for the voicemail recording.
 - Inform the LEP that you have or have not been able to leave a message in English and say goodbye to the LEP.

Important Practices:

- The Whisper prompt is the indicator that you will be handling a Direct Response call.
- Always follow the directions as provided in the whisper prompt since the wording can vary.
- Remain on hold with the LEP until the representative joins the call. The expected behavior is for us to remain on hold for the representative to take the call.
- Once you are automatically conferenced, greet the Client, let them know you are the interpreter by providing your full name, language, ID, and inform the Client their (language) speaking customer is on the line with you.
- In the case you are not automatically redirected to the Client within two to three minutes and do not hear a dial tone or hear dead air, kindly ask the LEP to hang up and call the same number again.
- If the Client puts you on hold, please wait as per Interpreter Guidelines and Procedure as you did with any other call.
- The Opening Statement Disclosure is not said on Direct Response calls.

Telehealth Calls

Telehealth calls are just another type of call where clients call using their preferred third-party conferencing platform. You can receive this type of call through the InterpreterConnect system. There is no change in how to process these calls, and they will come in as any other call.

If a Client advises you to hang up and call a different number, or join an external website to provide interpretation outside of InterpreterConnect, **DO NOT HANG UP** and do not dial the other number or join an external website provided. All calls and interpretation must be made through the InterpreterConnect system on behalf of LanguageLine.

Accessing Company Allowed Websites While Using InterpreterConnect

Note: Steps may vary slightly depending on the browser (Google Chrome or Safari) and the device you are using to access InterpreterConnect.

To access your Rackspace email, the Interpreter Portal, Workday, Verint/Impact360, or other approved websites while using InterpreterConnect, follow these steps:

1. Resize the InterpreterConnect browser window so it is not covering the entire screen.

2. Open a new browser window.
 - a. Use the browser menu to open a new window.
 - b. You can also use a shortcut to open a new window.
 - **Windows: Ctrl+N**
 - **Mac: Command (⌘) + N**

3. Resize the InterpreterConnect window and any new window(s) as needed to fit your device.
 - a. **DO NOT** maximize any new window(s) over the InterpreterConnect window. Covering the InterpreterConnect window completely will set you to an "Unavailable" state.

Google Chrome “Install App” Pop-Up

Accessing InterpreterConnect using Google Chrome may result in a prompt to install the “LanguageLine InterpreterConnect” app.

Installation is not required. Installing simply creates a shortcut and does not change any system functionality.
